PROFESSIONAL SUMMARY

Full Stack Developer with 2+ years of experience building web and mobile applications with Laravel/PHP, React.js, Node.js (MERN) and React Native. Skilled in REST API development, OAuth/JWT authentication, RBAC, MySQL optimization, and Redis caching and queues, Kafka messaging, and real-time features. Works closely with product, frontend and QA teams across the full development cycle.

TECHNICAL SKILLS

- **Languages** PHP, JavaScript (ES6+)
- **Backend** Laravel, Node.js, Express.js, REST APIs, MVC, Microservices
- **Frontend** React.js, React Hooks, HTML5, CSS3, Bootstrap
- **Mobile** React Native (CLI & Expo), Redux, Navigation
- **Security** OAuth, JWT, RBAC, Route Protection
- **Databases** MySQL, MongoDB, Redis (Caching, Queues, Pub/Sub), Indexing
- **Real-Time** WebSockets, Redis Pub/Sub, Kafka, Background Jobs
- **Tools** Git, GitHub, Linux, Postman, Agile

PROFESSIONAL EXPERIENCE

Software Developer Apr 2024 – Present
The NexGen Tech, Chennai

- Built RESTful APIs in Laravel for a CMS platform and an approval workflow system, secured with OAuth and role-based access control, and integrated them with React.js frontends.
- Developed real-time notifications using WebSockets and Redis Pub/Sub for workflow and content events.
- Contributed to modular microservices for authentication, workflow processing and content management, including OAuth token validation across services.
- Used Redis caching and queues and Kafka messaging for background processing, and tuned MySQL with indexing and query optimization to cut database load.
- Worked with product managers, frontend developers and QA through requirements, testing, deployment and production support.

PROJECTS

DigiPark | MongoDB, Express.js, React.js, Node.js, Kafka, REST APIs GitHub | Live Demo

- Full-stack MERN parking management platform with vehicle entry/exit tracking, parking slot management and reservations.
- Used Kafka for event-driven processing of vehicle entry/exit and slot-status updates.
- Built REST APIs for reservations, vehicle management and reporting, with MongoDB for data storage and retrieval.
- Implemented authentication and authorization for separate admin and user access.
- Developed responsive React.js dashboards for monitoring, reporting and operational management; deployed on Vercel.

Approval Workflow Automation System | Laravel, React.js, Redis, WebSockets, OAuth

- Built a configurable multi-level approval workflow engine with flexible approval routing for business processes.
- Developed OAuth-protected APIs for approval actions, workflow transitions and audit logging.
- Added real-time notifications using WebSockets and Redis Pub/Sub.
- Integrated React.js dashboards for live process monitoring and tracking, improving workflow visibility.

Mobile Application | React Native Expo, Laravel API, Redis GitHub

- Built a cross-platform mobile app integrated with Laravel backend services and Redis-backed data access.
- Implemented authentication flows, navigation, reusable UI components and state management.
- Designed an extensible app structure to support future feature additions.

EDUCATION

Master of Computer Applications (MCA), Dhanalakshmi Srinivasan Engineering College, Perambalur 2021 – 2023
Bachelor of Computer Applications (BCA), Imayam Arts & Science College, Thuraiyur 2018 – 2021
